# OUR SOLUTIONS

We are Trusted Digital Provider Approved By MDEC

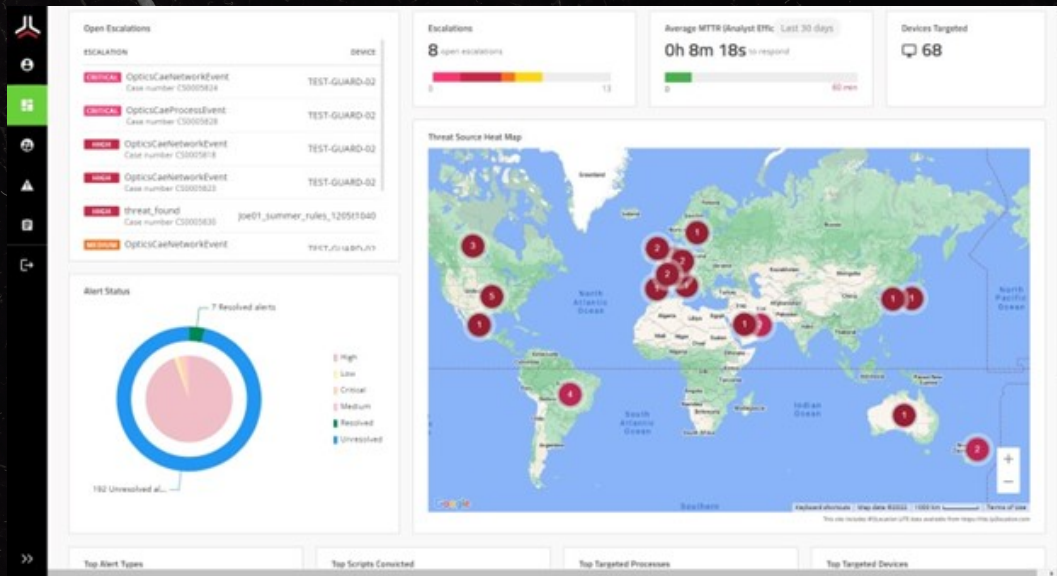

## VULSAN X ENDPOINT

Vulsan X Endpoint Protects Your Business. A modern approach to cybersecurity and risk management

Prepare for IT outages, ransomware lockouts and business disruptions before they happen. Prevent cyberattacks, internal threats and data security risks effectively and efficiently.

Dashboard

## CylanceENDPOINT

The solution combines self-defending Cylance® AI prevention, detection, and response to stop more attacks earlier and with less human intervention. It provides visibility into attacks and speeds investigation and response.

## CylanceINTELLIGENCE

CylanceINTELLIGENCE provide organizations with advanced threat intelligence and analysis to proactively detect and prevent cyber threats.

## CylanceGUARD

24x7x365 Managed Detection and Response (MDR) experts are an extension of your team. They keep your organization secure at a fraction of the time and cost to build your own SOC.

### Small businesses using laptops or computers

- To protect against viruses, ransomware, and hackers.

### Businesses that handle customer or company data

- Like clinics, shops, online businesses, accounting, or law firms.

### Companies with no IT or cybersecurity staff

- Easy to install and use, with support from our team.

### Businesses that want to follow data protection rules (PDPA)

- VXEP helps you stay compliant and safe.

## CYBER THREAT INTELLIGENCE

**VXCTI** is perfect for any SME that wants to detect threats early and stay safe online — and now it's **50% off** with the **PMKS MADANI Grant**.

### WHY CHOOSE VX CTI?

- **Enhanced Threat Visibility:** Stay ahead with continuous, real-time data on emerging threats.
- **Reduced Response Time:** Respond to threats 40% faster, supported by real-world case studies.
- **Firewall Compatibility:** Seamlessly integrates with major firewalls for robust threat prevention.
- **Informed Security Decisions:** Actionable intelligence enhances strategic planning and defense.

### CYBERSECURITY APPLICATIONS

#### **Threat Detection & Prevention:**

Integrate IOCs into security tools for proactive defense.

#### **Incident Response & Threat Hunting:**

Leverage intelligence for effective response and preemptive threat hunting.

#### **Policy Development & Security Awareness:**

Update policies and train teams with the latest threat insights.

### KEY FEATURES

- **Real-Time Intelligence:** Up-to-the-minute updates on Indicators of Compromise (IOCs), threat actor profiles, and vulnerabilities.
- **Home-Grown & Global Intelligence:** Regional honeypots and data from over 30 international sources offer comprehensive threat coverage.
- **Continuous Updates:** Hourly feed refreshes ensure you have the latest intelligence.
- **Seamless Integration:** Easily works with firewalls, IDS, and SIEM systems for enhanced detection and response.

## NEONOSINT

Vulsan X NeonOsint is a strategic solution designed to give organizations full visibility into external digital threats that can damage brand reputation and compromise trust. Through advanced open-source intelligence (OSINT), NeonOsint empowers you to

monitor, detect, and mitigate risks from brand impersonation to dark web mentions ensuring your brand remains trusted and secure

### CORE CAPABILITIES

#### Dark Web Monitoring

Discover mentions, leaks, or attacks lurking in the dark

#### Report & Takedown

Facilitate action on unauthorized content or threats.

#### Web Crawler

Scan the internet and indexed data for suspicious activity.

#### Profiling

Identify and monitor potential threat actors and digital assets

#### Businesses that want to know if their data is leaked online

- We monitor websites, forums, and the dark web for stolen data or company mentions.

#### Companies worried about leaked emails, passwords, or internal files

- You'll get alerts if your info is exposed — before it becomes a bigger threat.

#### SMEs that want better visibility of online risks

- Know if your brand, staff, or systems are being targeted without you knowing.

#### Businesses with social media or public exposure

- Useful for companies dealing with customers online or have an online reputation to protect.

### WHY CHOOSE NEONOSINT?

VX NeonOsint anticipates and intercepts threats with continuous monitoring, protecting your brand reputation and enabling rapid removal of malicious content. It distills raw data into clear, actionable intelligence for informed decision-making. With flexible deployment and unlimited scalability, it integrates seamlessly and grows with your business.

# invisiron®

In Invisiron, we believe the outcome of the cyber war is determined at the frontlines.

Bringing together the best industry practices and latest technologies in cybersecurity, we have designed the next-generation Cyber Defence device that is proactive, robust and most importantly invisible to intruders.

We have a proactive Cyber Defence platform with Auto Threat Mitigation.

Our solutions are plug-and-play which do not require any changes to existing IT infrastructure networks.

Our stealth Cyber Defence technology is completely invisible to hackers when deployed.

An in-line Cyber Defence platform that does not impact internet bandwidth performance.
