

NeonOsint

Proactive Brand Protection with Advanced OSINT
Intelligence

About VX NeonOsint

Vulsan X NeonOsint is a strategic solution designed to give organizations full visibility into external digital threats that can damage brand reputation and compromise trust.

Through advanced open-source intelligence (OSINT), NeonOsint empowers you to monitor, detect, and mitigate risks from brand impersonation ensuring your brand remains trusted and secure.

Core Capabilities

Profiling

Identify and monitor potential threat actors and digital assets.

Web Crawler

Scan the internet and indexed data for suspicious activity.

Report & Takedown

Facilitate action on unauthorized content or threats.
