

DARKSIGHT

THREATS DON'T HIDE — NOT FROM US.

WHAT WE DO ?

VX DARKSIGHT is an advanced dark and deep web monitoring platform that gives organizations visibility into hidden online spaces where threats emerge before reaching the public. It continuously scans underground marketplaces, hacker forums, leak sites, and encrypted channels to detect stolen data, compromised systems, brand impersonation and cybercriminal activity

SOLUTION OVERVIEW

1

Dark Web Monitoring

DarkSight provides continuous brand protection by monitoring for impersonation, phishing, and domain fraud. It identifies misuse across social media, marketplaces, and the dark web to safeguard your digital identity.

2

Dark Web Threat Intelligence

VX DarkSight monitors dark web communities to detect early threats like leaked credentials, stolen data, and ransomware by tracking cybercriminal activity targeting your organization.

3

Attack Surface Exposure Monitoring

VX DarkSight monitors your external attack surface to find and prioritize risks like shadow IT, misconfigurations, and unmanaged assets. It streamlines remediation by focusing teams on the most critical exposures.

4

3rd Party Dark Web Risk Scoring

VX DarkSight monitors supply chain exposure to identify vendor leaks, brand misuse, and underground mentions. Using risk scoring, organizations proactively manage threats originating from their digital ecosystem.

OUR PRODUCT VALUE

VISIBILITY

Continuous dark-web monitoring to spot and stop data breaches before they happen.

COST-EFFECTIVE HIGH ROI

Scalable service that lowers security spending and reduces in-house staffing needs.

RISK MINIMIZATION

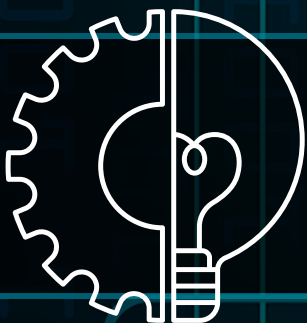

Advanced detection and prevention measures to safeguard sensitive information.

CORE MODULES

- Breach Monitoring
- Darkweb Monitoring

- Phishing Monitoring
- Social Media Monitoring

- Strategic Intelligence
- Threat Intelligence

- Operational Intelligence
- Tactical Intelligence

- Attack Surface Visibility
- Vulnerability Intelligence

- Executive Protection
- Compromised Device Detection

DARKSIGHT

WHY CHOOSE DARKSIGHT

AI-Enhanced Intelligence

Faster threat
detection and
correlation

Pre-Attack Visibility

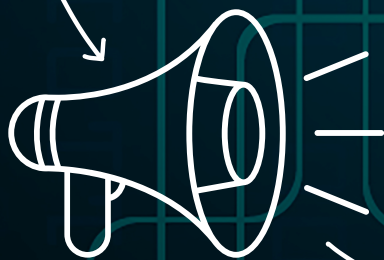

Identify and stop
breaches before
they occur

DARKSIGHT

Customizable Alerts

Tailored notifications
based on
your assets and
attack surface.

**COMPREHENSIVE
ASSET PROTECTION**
We secure domains, social
media, apps, and network
