

CYBER  
THREAT  
INTELLIGENCE

The Edge in Cyber Intelligence

# ABOUT VXCTI

VXCTI is an advanced Cyber Threat Intelligence (CTI) platform developed by Vulsan X Cydef Sdn Bhd. It empowers organizations to proactively defend against cyber attacks by delivering real-time, actionable intelligence from global and regional threat landscapes.

## VX PRECISION THREAT INTELLIGENCE

Tailored intelligence with sector-specific feeds, localized insights, and adaptive rules delivering maximum relevance and protection for your organization.

## KEY FEATURES

### Global & ASEAN Threat Coverage

- Intelligence feeds tailored to your business needs.

### API Integration

- Seamlessly integrates with firewalls, SOC, SIEM, and security tools.

### Threat Feed Support

- Compatible with all major firewalls and security systems.

### Advanced Threat Detection

- Seamlessly integrates with firewalls, SOC, SIEM, and security tools.

### Real-Time Insights

- Stay updated on ransomware, phishing, and targeted attacks.

### VXCTI Dashboard Platform

- Centralized visibility with real-time intelligence management

# VX CYBER THREAT INTELLIGENCE (CTI) IN ACTION:

## Home-Grown Cyber Threat Intelligence:

- VX CTI produces its own intelligence through honeypots and attack research, focusing on region-specific threats.

## International Sources of Cyber Intelligence:

- It combines this with data from over 30 international sources, ensuring comprehensive global threat coverage.

## CTI Infrastructure:

- VX CTI controls the entire process, from data collection to distribution, ensuring secure and reliable intelligence delivery.

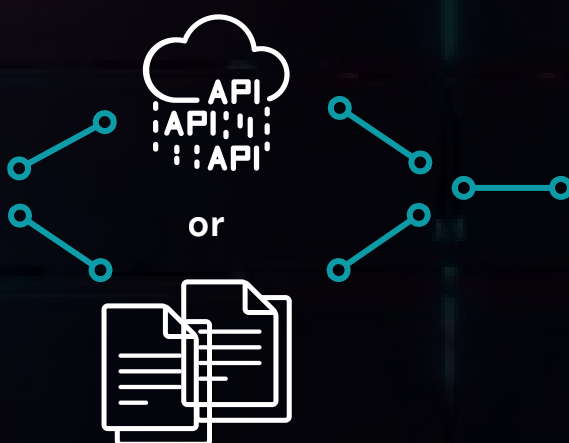

## Access to CTI:

- Access is managed via cloud-distributed license keys, ensuring secure use by authorized users only.

## Deep Packet Inspection Rules:

- The CTI feeds include deep packet inspection (DPI) rules to enhance detection of malicious network traffic.

## Integration:

- VX CTI integrates seamlessly with existing security tools, improving threat detection, prevention, and incident response.

Protected by VXCTI

# ASEAN-CENTRIC HONEYPOT NETWORK (REGIONAL STRENGTH)

Unlike generic global threat feeds, VXCTI operates its own network of regional honeypots strategically deployed across Malaysia, Singapore, Thailand, Indonesia, Philippines, and other ASEAN nations.

These honeypots capture first-hand data on localized attack campaigns, including:

- Regional malware variants targeting ASEAN industries.
- Country-specific phishing campaigns and fraud schemes.
- Advanced Persistent Threats (APT) linked to local and regional actors.

By combining localized intelligence with over 30 trusted global sources, VXCTI provides the most relevant and actionable CTI for ASEAN organizations.

## SUCCESS METRICS / CASE IMPACT

- 40% reduction in phishing attack impact for a major bank.
- Ransomware stopped within 15 minutes at a healthcare facility.
- Response time cut from 6 hours to 30 minutes for a government agency.

# VXCTI PRICING PACKAGES

## LITE VXCTI

- Coverage: ASEAN Threat Intelligence
- Includes API Key for seamless integration

➤ RM 10,950.00 – 1 Year  
➤ RM 32,850.00 – 3 Years  
➤ RM 912.00 – 1 Month

## ADVANCED VXCTI

- Coverage: ASEAN & Global Threat Intelligence
- Includes API Key for seamless integration

➤ RM 55,750.00 – 1 Year  
➤ RM 167,250.00 – 3 Years  
➤ RM 4,645.80 – 1 Month

## OPTIONAL ADD-ON: VXCTI PLATFORM

Unlock the VXCTI Threat Intelligence Platform — an advanced cyber defense dashboard designed to provide real-time visibility, centralized intelligence management, and actionable insights.

Note: The platform add-on requires a subscription to either Lite VXCTI or Advanced VXCTI.

- RM 55,250.00 – 1 Year
- With platform access:
- ✓ Receive VXCTI feeds directly inside the dashboard.
  - ✓ Correlate with your own threat intelligence sources for a single-pane-of-glass view.
