

NeonOsint

Proactive Brand Protection with Advanced OSINT
Intelligence

About VX NeonOsint

Vulsan X NeonOsint is a strategic solution designed to give organizations full visibility into external digital threats that can damage brand reputation and compromise trust.

Through advanced open-source intelligence (OSINT), NeonOsint empowers you to monitor, detect, and mitigate risks from brand impersonation to dark web mentions ensuring your brand remains trusted and secure.

Core Capabilities

Profiling

Identify and monitor potential threat actors and digital assets.

Web Crawler

Scan the internet and indexed data for suspicious activity.

Dark Web Monitoring

Discover mentions, leaks, or attacks lurking in the dark web.

Report & Takedown

Facilitate action on unauthorized content or threats.

Brand Risk Indicators

- Brand Impersonation
- Domain Spoofing / Typosquatting
- Leaked Credentials
- Dark Web Mentions
- Counterfeit Products
- Phishing Campaigns
- Sensitive Data Exposure
- Negative Brand Sentiment / Defamation
- Content Scraping & Unauthorized Use
- Executive or Employee Targeting (VIP Profiling)
- Logo and Visual Asset Misuse
- Malicious Mobile Apps

Why Choose VX NeonOsint?

- Stay ahead of threats with early warnings
- Protect brand reputation & trust
- Take down malicious content quickly
- Gain actionable insights, not just noise
- Flexible deployment & scalable intelligence

Comparison: Manual Monitoring vs. NeonOsint

Manual Monitoring

- Requires manual search on forums or dark web sources (slow, limited coverage)
- Manual checking of profiles and pages, prone to oversight
- No centralized view; information scattered across tools/spreadsheets
- Not available; relies on manual reading or public complaints
- Visible monitoring; attackers may notice and change tactics

NeonOsint

- Requires manual search on forums or dark web sources (slow, limited coverage)
- Manual checking of profiles and pages, prone to oversight
- No centralized view; information scattered across tools/spreadsheets
- Not available; relies on manual reading or public complaints
- Visible monitoring; attackers may notice and change tactics
